

# **DHIS2 Disease Surveillance Community**

# Key Activities

- Share implementation experiences and lessons learned from countries
- Share technical solutions across country implementations (DHIS 2 platform configurations, how was DHIS 2 "mapped" to surveillance activities in the country etc.)
- Discuss DHIS 2 requirements and priorities
- Share core use cases descriptions (e.g. per disease)
- Share updates on software development and roadmap process for improving dis. surveillance capabilities in DHIS 2
- Share updates on country status on DHIS 2 for disease surveillance implementations
- Develop shared training materials and plan trainings together - leverage the DHIS 2 academy program

# How?

- **Public online resource for documentation and material**
  - [Moodle instances with all the relevant academy material and slides](#)
  - [DHIS2 CBS Academy instance](#)
  - [DHIS2 CBS Demo Instance](#)
- **E-mail list for discussions and updates**
  - DHIS2 Case-Based Surveillance Community - [dhis2-cbs-community@knowledge-gateway.org](mailto:dhis2-cbs-community@knowledge-gateway.org)
- **Monthly calls for community updates**

# Possible Topical Areas

## 1. Requirements and feedback

Data standards, data collection, surveillance rules, alerts, outbreak workflow, case tracking/follow-up, analytics, interoperability

Use case descriptions per disease (at least for priority diseases)

## 2. Platform configuration

Approaches, Shared Resources

## 3. Training/workforce

## 4. Country updates and implementation approaches

## 5. Other?
