

Open-source, free software to collect, manage and analyze information in developing countries

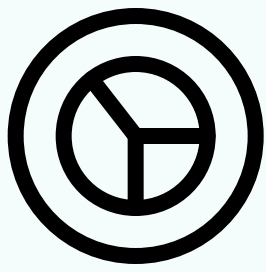

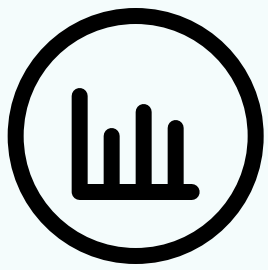

65+ countries
and many NGOs using DHIS2

2.3 billion people
covered by DHIS2

4500+ participants
trained at DHIS2 Academies

Real time visualizations powering decision making

Tailored data visualizations are accessible in real-time to managers at all levels of the health system through dashboards, scorecards, pivot tables, maps and charts.

Captures individual level data, over time, about anything

All data; Immunization records, pregnant women, lab samples or even geographical areas. In many cases, it is used to create digital health records.

Targeting the frontline with Android

The DHIS2 Android app targets the frontline workers, those who are where the initial data is generated. It integrates the three DHIS2 data models (aggregate values, single event and tracker programs) to offer a simplified user experience.

DHIS2 Community of Practice

community.dhis2.org

What is the DHIS2 Community of Practice for?

Discuss your DHIS2 experiences

Give feedback

Ask questions and get support

Make connections with others

Comment on DHIS2 roadmaps

Get news on upcoming events
